

# ROSS LILLIS

## FULL STACK WEB DEVELOPER

Parkville, Melbourne VIC 3052 +61 418 993 349

ross.lillis@gmail.com | [www.linkedin.com/in/ross-lillis](http://www.linkedin.com/in/ross-lillis) | <https://github.com/roscolil>

### ABOUT ME

Enthusiastic and committed Web Developer with 2+ years experience. I love coding because there is nothing more satisfying than solving problems and seeing your ideas come to life. I especially get a kick out of finding and learning new libraries and frameworks, and getting the front and back ends working together.

My goal is to become a valued contributor for startups and/or established businesses requiring a highly motivated, passionate technologist with a willingness to learn, a focus on continuous improvement both personally and professionally, and an easy going attitude.

### SKILLS

HTML5/CSS3

Javascript

Node.js

React.js

Typescript

Gatsby.js

Jest/Enzyme

SQL

Ruby on Rails

Git & GitHub

Sass

AWS EB/S3

Netlify

### EDUCATION

General Assembly

Web Development Immersive,

Nov '17-Mar '18 (see below)

PM Partners

Prince2 Practitioner, 2007

Interim Technology

Diploma IT (Business

Programming), 1999-2000

- CompTIA Linux+
- ITIL Service Management Essentials

### EXPERIENCE

Nura

Web Developer, 2019 - 2021

- Delivering changes and continuous improvements to Nura's customer-facing website ([www.nuraphone.com](http://www.nuraphone.com)) and eCommerce platform
- Maintaining and building upon existing infrastructure and delivering feature changes across the full tech stack including but not limited to Webflow CMS, SQL, Ruby on Rails, Shopify, AWS Elastic Beanstalk and S3.
- Commenced re-platforming of [nuraphone.com](http://nuraphone.com) to [gatsby.js/react/netlify](https://gatsby.js/react/netlify) utilising Agile development practises
- Use website experimentation/testing to continually optimise customer journeys from first impressions through to purchase
- Collaboration with UX/UI team members to deliver cutting edge visual experiences
- Building front-end components and scripting to support multiple promotional and product campaigns

Coredna

Web Developer, 2018-2019

- Working with Front End and Back End teams to develop and maintain client sites built upon Coredna's Digital Experience Platform
- Utilising Javascript/jQuery, HTML, CSS/Sass and Smarty PHP templating language to integrate new features and front-end logic into customer sites
- Translating customer requests into technical specifications in agreed timeframes
- Cross device/browser support and testing
- Bitbucket, Jira and Confluence for documentation

## General Assembly

*Web Development Immersive Alumni, 2017-2018*

- Designed and built secure full-stack web applications using both Javascript and Ruby on Rails
- Experience with associated frameworks and libraries
- Deployed applications to the web using cloud-based hosting and storage
- Working knowledge of web API's/RESTful web services

### Projects:

- Find me Fodder: Location based restaurant finder (*React.js, JSX, Javascript. zomato api*)  
[https://roscolil.github.io/find\\_me\\_fodder/](https://roscolil.github.io/find_me_fodder/)
